Dear Andy

Thank you for offering your help concerning Diggle Green Waste Management facility and the odours it is releasing over Lowton, Culcheth and Pennington.

This facility has been causing problems ever since it opened mainly from the traffic it is creating along Kenyon Lane. 45ft articulated lorries bringing waste in, then huge tractors delivering it out.

However this year the odours from the waste have been unbearable. It seems to have started after Wigan Council instructed residents to mix food with the green waste.

To enable you to catch up on the situation I attach a pack of correspondence.

Note we have now got the Environment Agency involved.

It is essential that this problem is cured before next year. Residents cannot suffer another summer like the last one.

I can arrange a meeting for you with the people who have been actively pursuing this. We can meet upstairs at Lowton Social Club. Give me a date convenient to yourself and I will sort it.

Regards

Ed Thwaite
Chairman
